SIMAGIC

Auto-matching & Troubleshooting

Press down the two buttons simultaneously for 5 seconds to start auto-matching

Press down the two buttons simultaneously for 5 seconds to enter Troubleshooting mode. When the mode is on, the lights keep switching to indicate a button or rotary is in working conditions or not.

## Connection between Steering Wheels and Wheelbases

The SIMAGIC Quick Release has 6 ball bearings on the upside, with 4 downside

6 ball bearings

Matching the base shaft

4 ball bearings

①

If auto-matching does not work, use an included USB-C cable to connect the steering wheel to the base from backside.
Connect to the base from the right side
Type-C Socket

②

Steering Wheel X 1

USB-C X 1

Button Stickers X 2

Factory Reset

Press down the two buttons simultaneously for 5 seconds to reset to factory settings (only for the wheel)

Paddle adjustments

Paddles are adjustable horizontally and vertically
